

Ez2[®] Rotary Action File

Take it for a spin.

Transform your clutter into organized, easy to manager storage areas with the Ez2® Rotary Action File. The unique, rotating cabinet-within-a-cabinet design allows access to either side of the unit simultaneously. And the fact that it's double sided means you can store double the files in a single shelving footprint.

The Ez2® has some amazing features that make it ideal for nearly any storage situation, regardless of what you're storing.

Flexible components for adaptable storage.

The Ez2® has options for equipping the interior of the cabinet to suit your storage needs. Standard shelves are available for storing files, books, binders, or other items. You can opt for drawer systems and choose from multimedia drawers to store your small miscellaneous items, or large storage drawers for hanging files and everything else.

Integrate and harmonize.

The enclosed cabinet construction of the Ez2® makes it not only a versatile storage tool, but it can also be integrated into the construction of a room.

If taking up floor space is not an option, you can install the Ez2® into a wall. The unit's ability to rotate 360° means the back of the unit doesn't need to be accessible in order to make full use of the cabinet.

The rotating feature also makes it an ideal room divider. Use it as a shared storage space, or utilize the locking feature to allow only one side to be accessible to its respective department.

McNees, Wallace & Nurick installations of Ez2® Systems on several floors of the building to store legal materials in large file folders.

Sure, we can do that.

No matter what the application or where the installation, we can find a way to satisfy your needs. We won't shy away from custom work, we welcome it with open arms.

Take this installation for example. It seems like a simple installation of a couple of 7 high Ez2® units filled with file folders.

However, the customer had quite a few special requests for their new systems. They wanted units that could be sat back to back to maximize the floor space usage. Pull-out reference shelves were needed that didn't snag on the underlying folders.

They were also looking for several different systems on different floors that were cohesive with the current interior design.

Compare and contrast.

When it comes to the Ez2® Rotary Action File, we feel that no one can compare to what we've created. Our style, functionality, affordability, and convenience are unique and unbeatable.

Expand your horizons.

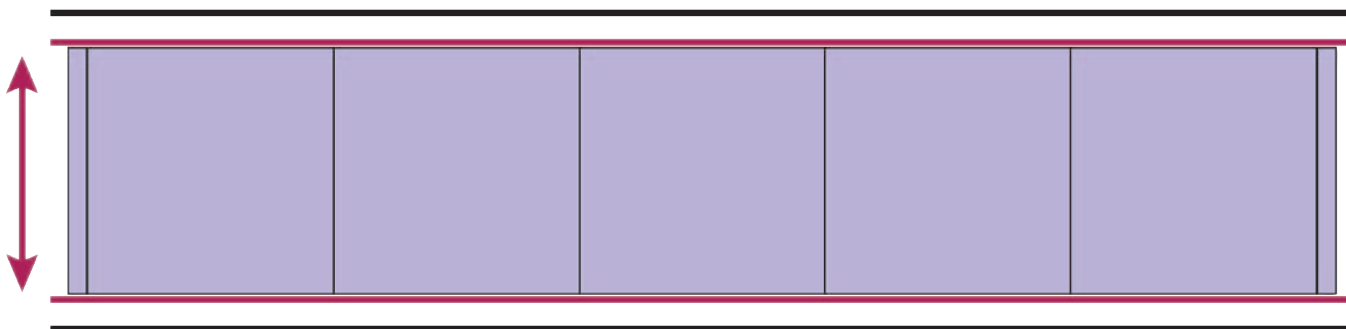

If you've just found your storage needs in the middle of a growth spurt, Ez2® can handle it. The Ez2® can be easily expanded to either side to accommodate your needs. You can add new units to either the right or the left of your existing units simply by removing the end panels, placing the new units, and then putting the end panels back on.

Expands easily to either side!

No foot pedal, no problem.

Our Ez2® units don't require a foot pedal to rotate the cabinet. What does this mean? Not on are our units easier to use, they also require less floor space. No foot pedal means a smaller footprint and it eliminates a tripping hazard.

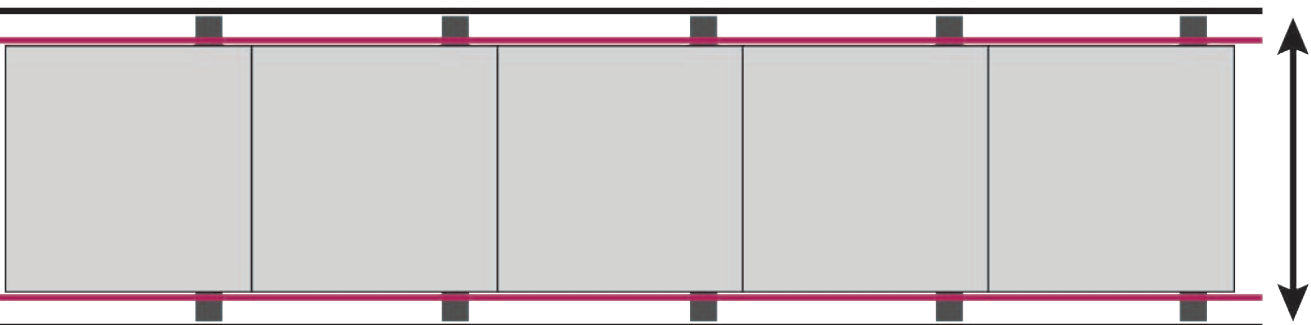

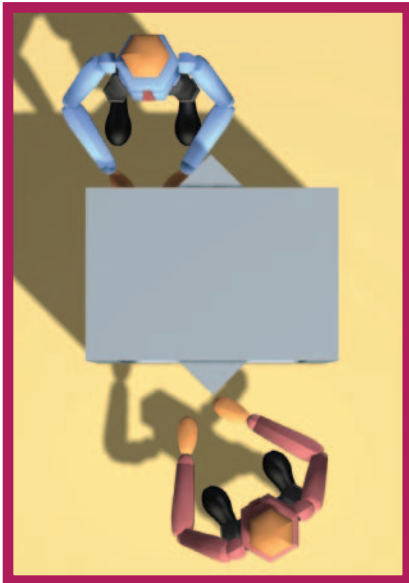

We don't call it "Ez" for nothing.

If you run out of storage and need to add more, it expands to either side with the simple addition of a new unit.

It can lock in all 4 positions for convenient usage and security.

Use it from either side. This hand feature makes it ideal as a room divider.

No matter how you look at it, the Ez2[®] really does live up to it's name.

CUSTOMIZABLE, VERSATILE, DURABLE AND GUARANTEED

For more than 30 years, Filingsupplies.com (formerly Filefax) has served San Diego and surrounding counties. We meet your challenges of limited floor space, budget constraints, and future expansion with a full line of innovative storage, filing, and material handling equipment. Connect with FS and build a superior workplace environment.

We are Southern California's dedicated provider of high-density mobile storage solutions, serving San Diego, Los Angeles, Orange, Riverside, San Bernardino, Ventura, San Luis Obispo, and Santa Barbara Counties. Available storage solutions include high density mobile storage systems, compact shelving, storage cabinets, storage lockers, weapon storage, modular caseworks and more - all with unmatched manufacturing efficiency.

We recognize that each market, organization and business is radically different and requires a different approach. A FS representative will visit your facility to measure spaces and carefully listen to your requirements. With over 1000 successful project completions in all markets, we're qualified to find a unique storage solution for you.
